

# Less Trouble Hearing. More Fun Talking.

## Optional Digital Cordless Handset

The KX-TGA717 is an optional handset for Digital Cordless Phone. You can add up to 5 KX-TGA717s and experience a new dimension of communication convenience like in-house Intercom and more. Plus, the KX-TGA717's Bone Conduction Technology makes it much easier to hear what the speaker is saying. So conversations go much more smoothly, no matter where you are or how noisy the surroundings are. Also it is especially useful for older people. Panasonic DECT phones bring more fun and convenience to your family communication.

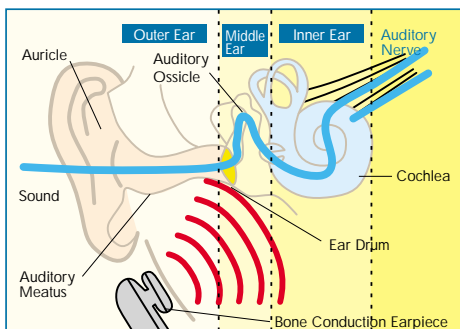

NOTE: The effectiveness of the bone conduction earpiece will vary by the type and degree of hearing loss of the user.  
The function of the KX-TGA717 will vary by the model of base unit you register.

# KX-TGA717

## Bone Conduction Technology

The Bone Conduction Technology converts amplified sound into mechanical vibrations, and sends them to the inner ear through the cranial bones, bypassing the outer and the middle ear. These vibrations stimulate the hairs within the cochlea, and are transmitted the same way as normal hearing to the auditory nerve. The resulting sound is loud, clear, and easy to perceive.

## Big Button Keypad on Handset

The KX-TGA717 features a big button keypad with backlight, along with a snug-fit, easy-to-grip design. This improves accessibility and usability.

## Talking Number Display (Voice Announce) (English only)

When a call comes in, the phone audibly announces the caller's phone number if Caller ID information is available (Caller ID Announce)\*<sup>1</sup>. You can also let the phone read aloud numbers on your Phonebook, Redial List and / or Caller List (Number List Announce).
